

# A Look At American Digital Exports

IA's newest report examines the economic impact of digital trade on America's economy. The report found that digital trade is a major economic driver, contributing hundreds of billions to exports and enabling more than a million jobs.

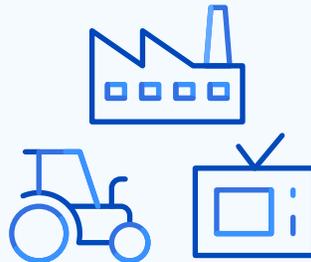

## DIGITAL TRADE MEANS JOBS AND GROWTH IN EVERY STATE

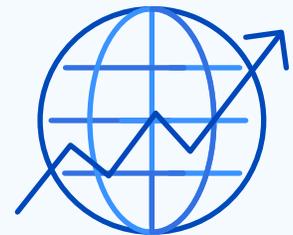

Note: ICT Service Exports are information communications technology service exports (aka digital service exports)

All 50 states benefit from digital trade. It creates jobs in every community.

60% of the jobs created by digital exports are in other industries like manufacturing, agriculture, and entertainment.

There's a strong relationship between digital trade and the economic welfare of a country.
